Welcome to another issue of our LABOM Newsletter !

Our feature topics in January:

- **Pressure transmitter COMPACT ECONomic for general application**
- **Pressure transmitter PASCAL CV - NEW with HART Registered Certificate !**
- **Pressure transmitter PASCAL CV for general application - up to 400 bar !**

Pressure transmitter COMPACT ECONomic for general application, CB7500 ECO

The compact pressure transmitter with digital signal processing

- Digital pressure transmitter
- Measuring ranges 0...1 up to 0...600 bar, -1...0 up to -1...15 bar
- Accuracy $\leq 0.3\%$
- Various process connections available
- Output signal 4...20 mA (20...4 mA), 2-wire
- Easy zero correction using a magnet

Pressure transmitter PASCAL CV - NEW with HART Registered Certificate

The intelligent PASCAL CV pressure transmitter meets the most challenging requirements

- PASCAL CV was one of the first pressure transmitters to be tested and certificated by the HART Communication Foundation.
- We guarantee to provide you with
 - best quality engineering and workmanship in our design and production processes
 - a highly flexible approach to satisfying all your requirement for all PASCAL CV design variants.

[More information](#) on PASCAL CV - HART Registered !

Modular pressure transmitter for general process technology

- Modular pressure transmitter with internal or flush-mounted diaphragm
- Limits of measuring range 0...80 mbar up to 0...400 bar
- Intelligent module technology „plug and measure“
- Accuracy $\leq 0,15 \%$
- HART protocol (option)
